

Africa 2023 - 10 - 12 July 2023

WATER STORAGE AND HYDROPOWER DEVELOPMENT FOR AFRICA

**will take place at the Speke Resort Munyonyo Conference Centre,
Lake Victoria, Uganda
~~29 November – 1 December 2022~~**

New dates : 10 - 12 July 2023

The objective of the regional conferences for AFRICA, co-hosted by Aqua~Media International and ICOLD, in collaboration with the governments of the host countries, is to bring together a group of experts from all parts of the world to focus on issues of specific interest for Africa, in the field of water storage and hydropower development.

Typically, participants include high-level representatives of ministries and utilities, private development groups, consulting practices, international and regional development banks, contractors, and equipment suppliers.

Themes begin with project identification and planning, progress through to financing, design, environmental protection, social aspects, and then construction, operation, maintenance and refurbishment.

Cross-border collaboration for transboundary schemes, challenging sites and climate resilience, as well as capacity building and training, are topics which always feature high on the agenda.

AFRICA 2022 will be the fourth conference and exhibition in this series. The first took place in Addis Ababa, Ethiopia, in 2013, under the auspices of the African Union, with a keynote address from the Commissioner for Energy and Industry. The second was held in Marrakech, Morocco in 2017, under the High Patronage of HE King Mohammed VI.

AFRICA 2019 moved south to Windhoek, Namibia, and had strong participation from NamPower, the Global Water Partnership - Southern Africa, and the Southern African Power Pool. The World Bank, African Development Bank, and the African Union, have all contributed much to the programmes.

Uganda is an enthusiastic local partner for AFRICA 2022. International delegates and accompanying persons will meet in beautiful surroundings, for three days of sessions, preceded by workshops and training seminars, and followed by tours to hydro schemes. There will be plenty of additional networking opportunities, and cultural excursions.
