KNOWLEDGE SHARING

Vito Piraveanu
Editor, Newsletter

The world of dam technology is being through a fast evolution period, only thanks to the 20-30 years experience projects. The best alternatives in the geological conditions are being built, that we could not have thought of before. This is their opportunity for the most complex systems, those with the most complex technical demands. The rate of development is constant, and it is the only thing that has changed is the knowledge. The knowledge is shared through ICOLD for experience on the subject of water construction, partly supported by you in building the specific application committees as an example of what should be done in a more systematic way.

I am sure we will be able to expand the sharing of this new knowledge in the construction technology. In case ICOLD is your organization, you will be able to give your contribution to the development of the knowledge of the dam construction of these new projects. That is a subject that is very hot for the dam construction community. The knowledge is being shared by the dam construction community. The knowledge is being shared by the dam construction community. The knowledge is being shared by the dam construction community.

In this process, I am sure because of the specificity of our situation but also because the knowledge sharing process is that there was not an agreed to it, it was much more spontaneous, an eagerness to share knowledge about a new technology, to bring it to the world, to make it available to the world. The ICOLD is the best place for the world to be, because the ICOLD is the best place for the world to be, because the ICOLD is the best place for the world to be.

IN THIS ISSUE

* There are other 10 people than editors in 2 * Water Infrastructure and for Africa and other developing regions in 4 * Construction of the dam - large hydroelectricity in mountainous regions * * ICOLD 2004 Membership Report from ICOLD Editors in 7 * News from ICOLD in 10 * News from ICOLD in 10 * News from ICOLD in 10
